JAPAN.

Cholera.

Acting Assistant Surgeon Moore at Kobe reports, October 19:

During the week ended October 15 there were reported at Kobe 26 cases of cholera with 18 deaths. The total number of cases reported at Kobe since the outbreak is 232 with 105 deaths.

At Osaka the epidemic of cholera continues. To date 593 cases have occurred. The disease has spread over a wide area of the rural districts. In all Japan more than 800 cases have been reported.

Sanitary Inspector Bowie at Nagasaki reports, October 19: Two cases of cholera have occurred at Nagasaki—one in a sailor who was landed from the steamship *Chicago Maru* just prior to the sailing of the vessel for Manila and the other in a local resident.

To date 44 cases of cholera have been reported at Moji with 25 deaths. The disease seems to be spreading steadily along the line of railroad.

MEXICO.

Yellow Fever at Campeche.

The following information, dated November 14, was received from the president of the superior board of health:

During the week ended November 12 there was reported at Campeche 1 case of yellow fever, with 1 death. The case was reported on November 6 and the death on November 7.

MOROCCO.

TANGIER—Smallpox.

The following information was received from the Department of State November 21:

The American vice-consul at Tangier reports smallpox present in the foreign colony, but not in epidemic form.
